Name of Authorizing Body: **Central Michigan University**

98c Learning Loss Plan

Data Analysis:

NWEA comparison data over the last three years reveals a learning loss specific to the area of reading and second grade math. Fall 2020 NWEA scores were used as a baseline. According to the 2022 fall data, six of the nine grade levels are still showing fall reading average scores less than the fall baseline scores in Fall 2020.

To assist in addressing this learning loss, Holly Academy will do the following:

Step 1: Identify the need by analyzing Fall 2022 NWEA data in the areas of reading and math.

Step 2: Hire an additional Interventionist to assist in the area of deficit. Up to \$25,000 of the additional ESSER funding would be allocated to an additional reading/math Interventionist to service the grade levels revealing the deficit.

Step 3:

Allocate up to \$10,000 of the additional ESSER funding to after school tutoring specific to the areas of deficit. Teachers or Interventionists will be hired to provide the after school tutoring services.
